YALE NEW HAVEN HEALTH SYSTEM SELECTS HEALTHFLASH SYSTEM

Atlanta, Ga. and New Haven, CT, January 3, 2002 - Yale New Haven Health System has chosen HealthFlash's software to help them to manage their large scale projects and to facilitate JCAHO accreditation and HIPAA compliance management at each of its' three hospitals. The Yale New Haven Health System includes Yale-New Haven Hospital, Yale-New Haven Children's Hospital, Yale-New Haven Psychiatric Hospital, Bridgeport Hospital, and Greenwich Hospital.

"We look forward to using the HealthFlash system to manage our projects, measure performance, and to assist us in achieving HIPAA compliance," said Deb Durkee, Yale New Haven Health System's director of IS Strategy and Support. "The HealthFlash application was the best tool on the market to meet our needs."

"Yale New Haven Health's selection of HealthFlash will validate the design of our system to enable large systems such as theirs," said David Smith, President and CEO of HealthFlash. "We are pleased to be an early adopter of the HealthFlash application" noted Joe Zaccagnino, President and CEO of the Yale New Haven Health System, "and it clearly is a significant enhancement to our e-health strategy".

About Yale New Haven Health Services

With the help of a managed care, physician integration and corporate services infrastructure, Yale New Haven Health's system supports its network's efforts to provide the highest quality health care to communities served in Eastern Westchester County, New York, Southern Connecticut and Southwestern Rhode Island. Yale New Haven Health's health care delivery system offers a full continuum of care-from primary and preventive to subacute and home care.

About HealthFlash

HealthFlash has emerged as a leader in providing software solutions for compliance to the healthcare industry. Whether the healthcare organization is an integrated delivery system, hospital, physician group, health maintenance organization (HMO) or an ancillary healthcare provider, HealthFlash brings software solutions to senior management with tools that focus on strategic initiatives and managing organizations more efficiently. HealthFlash's software

MORE

applications assist healthcare organizations with projects, accreditation, compliance, and document management. HealthFlash's suite of tools allows hospitals, managed care organizations, and other healthcare entities to manage their compliance process for JCAHO, NCQA and URAC standards, HIPAA and CMS regulations, and other programs being mandated by federal and state agencies - providing better management of their compliance, accreditation, and strategic projects through a single enterprise-wide application. HealthFlash is being used by Kaiser Permanente, St. Jude's Children's Hospital, Blue Cross Blue Shield of Georgia, and Catholic Healthcare Partners among many other healthcare providers.

Prior to HealthFlash, healthcare organizations did not have a centralized, efficient way to manage projects key to record keeping and government regulatory compliance. HealthFlash offers flexible, efficient and secure solutions to promote collaboration and accountability among team members of healthcare systems by managing all information related to projects, performance measurement, tasks, meeting and documents.
